WORK EXPERIENCE

Associate Consultant Capgemini

04/2023 - Present

Client : H&M

Pune, India

Overview

- Promoted to a new role for the quality of my work in my previous job role.
- Entrusted with greater individual responsibilities for critical development tasks and initiatives.

Senior Analyst / Data Engineer Capgemini

09/2022 - 03/2023

Client : H&M

Pune, India

Overview

- Worked as GCP Data Engineer on BigQuery, Cloud Storage, Cloud Run, Cloud Pub/Sub, Cloud Scheduler, and Cloud Shell.
- Hands-on experience in building ETL/ELT pipelines on GCP for large-scale data ingestion from various sources.
- Skilled in Python scripting with foundational knowledge and experience.
- Utilized SQL development skills to extract and analyze data within BigQuery.
- Well-versed in leveraging GitHub, Jira, and Confluence for effective project management.

Analyst / Data Engineer Capgemini

03/2021 - 08/2022

Client : Univision

Bengaluru, India

Overview

- Worked on creating ETL pipelines and enhancing existing pipelines to store incoming batch and streaming data from heterogeneous source systems into a data warehouse.
- Hands-on experience with Azure cloud services, Azure data factory, SSMS, and SSIS packages.
- Maintained the security and compliance of consumers' PII data in accordance with the United States Department of Justice mandate.
- Proficient in performing CCPA-mandated Right to Delete, Right to Know, and Right to Opt-out operations to safeguard consumer privacy.
- Ensured transparency on data costs and regulatory adherence by delivering monthly, semi-annual, and annual reports to clients.
